Airport Level Task Force's Scope of Work

Scope of Work

1. Review the **effectiveness of Level 2 and level 3 Airport principles** and develop **proposals for new principles** where it is identified that the current process is not optimal.
2. Review WSG section **6.1 'Demand and capacity management'** and establish the roles and responsibilities all stakeholders involved the frequency of the capacity analysis.
3. Recommend a set of **minimum criteria to be met for moving from one level to another.**
4. Perform **impact assessment** and proof of concept of the new proposed process and principles
5. Collect and analyze **global data and statistics** to support the evaluation of airport levels.

Historic Determination Task Force's Scope of Work

Scope of Work

1. Review the effectiveness of the **Slot Return Deadline (SRD)** and **Historic Baseline Date (HBD)** (WSG 8.5.1 – 8.5.3).
2. Review and evaluate improvements to **the Calendar of Activities** that best promote planning needs.
3. Identify and analyze the factors that result in the **delayed handback of slots**.
4. Identify existing levels of slot utilization, historic precedence, pre and post HBD slot returns.
5. Review and evaluate **the most appropriate length of a series of slots**.
6. Evaluate the **effectiveness of SRD, WSG timeline of activities** and how to optimize them with a view towards more efficient planning and usage of capacity.
7. Evaluate the impact of **different definition for slot series** (e.g. “per day of the week slot series” vs. a “weekly slot series”; length of the series in relation to season length);

	Delhi International Airport (DELHI)	Jaideep Singh Thakur (IN)

Slot Performance Monitoring Task Force's Scope of Work

Scope of Work

1. Perform information gathering exercise to **collect data on the actual performance from a sample of airports** and any another relevant stakeholders.
2. Based on the above data, identify **and analyze the problems related to actual performance** on the day and across the season.
3. Review and evaluate the factors that will drive **performance improvements and changes to processes** and propose potential improvements to the planning processes.
4. Review **of Force majeure factors** and their impact on performance.
5. Review the **Slot Performance Committee (SPC) and Coordination Committee (CC)** annex and rules with the potential for reinforcement and enhancement of the WSG, specifically:
6. Analyze the **On-Time Performance in relation to historic eligibility.**

Access to Congested Airport Task Force's Scope of Work

Scope of Work

1. Collect and evaluate **global data** (churn of slots, how much of the 50% N.E. pool is allocated etc.) **of the current utilization rates of slots**, how many new entrant requests have been met and how many have not, as well as share of capacity at airports with different levels of congestion and coordination. This information is vital to ensure that this task force acts on hard data regarding access to airports, and not just on assumptions about difficulties of access at a specific airport.
2. In light of this data, evaluate **changes that could make the new entrant rule** (WSG 8.3.5) more effective.
3. In light of this data, validate **the current list of additional allocation criteria** (WSG 8.4.1) and enhance and clarify where necessary and evaluate the current implementation.
4. Deliver a recommendation on the **future WSG policy on fair and neutral access to congested airports**, if a change is determined to be needed.
5. Consider whether guiding principles or best practices would be helpful for coordinators to assist in furthering a competitive environment in slot allocation.
