

COVID-19 Discussion

COVID has affected Asia-Pacific airports in different ways both inside the region and internationally. We would invite you to discuss the following topics, so that we can share our experiences:

- How has COVID affected the capacity parameters at your airport/s?
- What changes have been made to your capacity declarations and were they carried through for S21?
- How has COVID affected your coordination activities? Has the demand for slot changes increased or decreased your workload?
- What are your thoughts on the waivers for W20 and S20? Are the airlines handing back slots on time?
- How do you see the industry recovering? And what are you expecting?
- How are you finding the virtual conference? Are most of your meetings through the portal provided by IATA or through other platforms?
- Would you travel if there was a conference in June 2021?
