Asia/Pacific Airport Coordinators Association (APACA)

Chairman, Ernst Krolke

Dear visitors,

Welcome to the website of the APACA, the Asia/Pacific Airport Coordinators Association.

APACA is the trade association of airport coordinators and schedule facilitators in Asia/Pacific regions. The mission of airport coordinator is to allocate the slots for take-offs and landings for airlines at congested airports (level 3 airports). The mission of schedule facilitators is to coordinate the schedule on a voluntary basis among airlines at congested airports (level 2 airports).

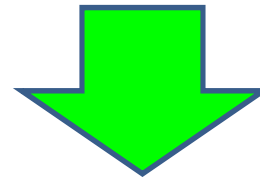

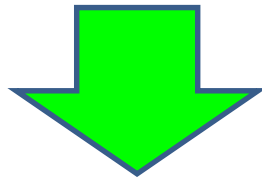

The purpose of this website is to promote delivering a professional, neutral, non-discriminatory allocation services and schedule facilitation services to aviation industry to optimize the use of capacity at Asia/Pacific airports.

You will find on this website more details about our organization, its role and strategy. Through this website you can also find out details of our members and associate members and gain access to their own websites.

Fundamental Questions

- | Do we really need the APACA website?
- | What kind information should be incorporated in the website?
- | There are many organizations who do not have their own websites for transparency. It might be a good idea to use APACA website to upload their schedule information.

Questions for implementation

- | How much does it cost to develop the APACA website?
- | How do we finance the development cost?
- | Who is going to maintain the website?
- | How much does it cost to maintain the website?
